**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 08 February 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### **DETAILED ACTION**

Receipt and entry of Applicants' Preliminary Amendment filed on Feb. 8, 2006 is acknowledged.

#### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### ***Election/Restrictions***

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows: Figs. 3 and 12, Fig. 4, Figs. 5 and 6, Fig.7, Fig.8, Fig.9, Fig.10, Fig.11, Fig.13 and Fig.14.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 3748

The claims are deemed to correspond to the species listed above in the following manner:

- Figs. 3 and 12: claims 2, 4, 6, 9, 10 and 12
- Figs. 5 and 6: claims 3 and 13
- Fig. 9: claim 7
- Fig. 13: claim 11.

The following claim(s) are generic: 1, 5 and 8.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

- The species of Figs. 3 and 12 is drawn to a scroll wall arrangement having first and second inlet and first and second flow paths.
- The species of Fig. 4 is drawn to a scroll wall arrangement having double start at the first inlet.
- The species of Figs. 5 and 6 is drawn to a scroll wall arrangement having a second inlet being isolated from the first flow path by approximately one wrap of the fixed scroll.
- The species of Fig. 7 is drawn to a scroll wall arrangement having a single start in respect of the first inlet and a double start in respect of the secondary inlet.
- The species of Fig. 8 is drawn to a scroll wall arrangement having a double start for both the first inlet and the second inlet.
- The species of Fig. 9 is drawn to a two one-sided scroll wall arrangements driven by a single motor.
- The species of Fig. 10 is drawn to a double sided scroll wall arrangement comprising an inlet at a radially central portion of a first side of the arrangement and an inlet at a radially outer portion of the arrangement

- The species of Fig. 11 is drawn to a two sides of the double sided scroll arrangement being provided with first and second inlets having respective flow paths extending towards respective outlets.
- The species of Fig. 13 is drawn to a differentially pumped system having first, second and third chambers and turbomolecular pump having first and second inlets.
- The species of Fig. 14 is drawn to a differentially pumped system having first, second third and fourth chambers and a first inlet being connect to the exhaust of a split flow turbomolecular pump and the second chamber.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 3748

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theresa Trieu whose telephone number is 571-272-4868. The examiner can normally be reached on Monday-Friday 8:30am- 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas E. Denion can be reached on 571-272-4859. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
